Subject: Email to document the discussion between EPA COR Martha Bosworth and John F. Kelly (Weston START) regarding the Jard Company Inc. HRS Assignment held at 1425 hrs. 3/3/14.

Martha,

This email is to document the discussion between EPA COR Martha Bosworth and John F. Kelly [Weston START Project Leader (PL)] regarding the Jard Company Inc. HRS Assignment held at 1425 hrs. 3/3/14.

START PL Kelly contacted COR Bosworth via cell phone (978-257-0496) after leaving messages earlier in the day to request EPA Headquarters' assistance with a question regarding the Jard Company Inc. HRS Surface Water Pathway Section, specifically a question regarding calculation of the potential fishery values within the ground water to surface water component of the HRS surface water pathway. COR Bosworth noted that she was not in the office today.

START PL Kelly pointed out that START had finally been able to obtain confirmation today from a Fishing Guide that people local to the Bennington VT area catch and consume fish caught along the Walloomsac River. However, START is unable to recalculate the values the Headquarters' contractor had presented/estimated in the Jard Company Inc. HRS - 2nd QA Comments Letter. Therefore, START was requesting that COR Bosworth arrange a short conference call with Headquarters and their contractor to verify the correct manner by which to calculate to determine potential fishery values within the ground water to surface water component of the HRS surface water pathway.

COR Bosworth said she would contact Headquarters in the morning (3/4/14) to try to make arrangements for a conference call as soon as possible, hopefully on Tuesday 3/4/14.

START PL Kelly discussed and requested extending the planned submission date by a day (until 3/5/14) to resolve the potential fishery value question/issue. COR Bosworth stated that START could have until the end of the week (3/7/14) to resolve the issue and submit the HRS Documentation Record to the Region (via her). START PL Kelly agreed to the new due date of Friday 3/7/14 for the Jard HRS Documentation Record.

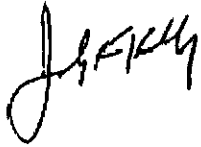

START PL Kelly asked if COR Bosworth had received the email from Wetland Specialist Foley last week and if she had a chance to review and add her signature to the final version of the Jard Wetland Delineation Memorandum. PL Kelly pointed out that the approved/signed final version of the memorandum is required as a reference to support the Jard HRS Doc. Record. COR Bosworth asked if PL Kelly knew when the email should have arrived. PL Kelly noted that he thought it had been sent on 2/26/14. COR Bosworth said she did not remember seeing the email from Ms. Foley, but would look upon her return to the office in the morning (3/4/14). PL Kelly said he would forward the email from Ms. Foley in case it did not get directed correctly to COR Bosworth. COR Bosworth said she would review the document in the morning.

COR Bosworth requested that PL Kelly send an email reminding her of the two following items:

- to conduct and arrange a conference call with Headquarters regarding the Jard SWP question/issue, and
- to follow-up on the Jard Wetland Delineation memorandum (signed cover sheet needed for HRS reference)

Please do not hesitate to contact me if you have any questions regarding the information provided in this summary record or if I have misinterpreted any portion of our discussion.

Thanks

John F. Kelly
